AR00033PU-N Coxsackievirus B5 (Strain Faulkener) - Purified

Quantity: 1 mg

Concentration: 0.57 mg/ml (Bradford)

Source: Vero cells, (Strain Faulkener, ATCC VR-185)

Format: **State:** Liquid partially purified protein without preservatives
Purity: Infected cells are disrupted and clarified to remove cell debris. Virus is concentrated by ultracentrifugation and presented in cell culture medium without FCS. The resulting antigen preparation consists of a high concentration of virus and viral components as well as some cellular material.

Description: Coxsackievirus B5 Antigen, Strain Faulkener, ATCC VR-185
Inactivation: Heat treatment at 56°C.
Confirmation by attempted growth under original culture conditions.

Storage: Store the protein at -20°C to -80°C.
Avoid repeated freezing and thawing.
Shelf life: one year from despatch.

Caution: No test guarantees a product to be non-infectious. All materials should be handled as if potentially infectious. Generally accepted laboratory practices appropriate for infectious materials should be employed when handling this product.

For research and in vitro use only. Not for diagnostic or therapeutic work.
Material Safety Datasheets are available at www.acris-antibodies.com or on request.
