

Monoclonal Antibody to MMP-11 (active form) - Purified

Alternate names:	MMP11, Matrix metalloproteinase-11, SL-3, ST3, STMY3, Stromelysin-3
Catalog No.:	DM393-05
Quantity:	0.5 ml
Background:	Matrix metalloproteinase (MMPs) are a family of closely related zinc-containing proteolytic enzymes, capable of degrading connective tissue components. MMP-11 is localized on the long arm of chromosome 22. MMP-11 gene was originally identified on the basis that it is expressed specifically in stromal cells surrounding invasive breast carcinomas. MMP-11 is expression is found more specifically in malignant tumors than in benign ones.
Uniprot ID:	P24347
NCBI:	NP_005931.2
GeneID:	4320
Host / Isotype:	Mouse / IgG1
Recommended Isotype Controls:	SM10P (for use in human samples), AM03095PU-N
Clone:	SL3.05
Immunogen:	BALB/C mice were immunized with a recombinant protein corresponding to active form of human MMP-11.
Format:	State: Purified Ascites containing Sodium Azide as preservative.
Applications:	Immunoprecipitation. Western Blot. Immunohistochemistry on Paraffin Embedded Sections: Use a dilution of 1/50-1/100 in an ABC method (incubation time: 30 minutes at room temperature). No special pretreatment is required. Recommended Positive Control: Placenta. Other applications not tested. Optimal dilutions are dependent on conditions and should be determined by the user.
Specificity:	This antibody Reacts with a protein of 60 kD (latent), 47 kD (active) and 35 kD (degradation product). Cellular Localization: Cytoplasmic. Species: Human. Other species not tested.
Storage:	Store the antibody undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer. Avoid repeated freezing and thawing. Shelf life: one year from despatch.
