

Product Information

Contents: Phycoerythrin (PE) anti-mouse CD45RC

Catalog Number: 12-0456

Sizes: 50 ug, 100 ug, 200 ug

Formulation: Phosphate buffer pH 7.2,
500 mM NaCl, 0.09% NaN₃

Storage Conditions: Store at 4°C.

DO NOT FREEZE.

LIGHT-SENSITIVE MATERIAL.

Clone: GL24

Isotype: Rat IgM, κ

Surface staining of mouse splenocytes with anti-mouse CD45RC (GL24) FITC (left), and PE (right). Appropriate isotype controls were used (open histogram). Total viable cells were used for analysis.

Available Formats of This Product

Cat. No.	Format	Excite (nm)	Emit (nm)	Reported Applications
11-0456	FITC anti-mouse CD45RC	488	518	FC
12-0456	PE anti-mouse CD45RC	488	575	FC
13-0456	Biotin anti-mouse CD45RC	N/A	N/A	FC
14-0456	Affinity Purified anti-mouse CD45RC	N/A	N/A	FC IP

Description

The GL24 monoclonal antibody reacts with the exon C-dependent isoform of mouse CD45. This CD45 isoform is expressed by peripheral B cells and a population of CD4⁺ T cells at high levels, on a majority of CD8⁺ T cells at intermediate levels and by a subpopulation of mouse thymocytes. CD45 is a protein tyrosine phosphatase and serves an important role in leukocyte signal transduction.

Usage

For research use only, not for diagnostic or therapeutic use. The GL24 antibody has been reported for use in flow cytometric analysis.

Applications Tested

The GL24 antibody has been tested by flow cytometric analysis of mouse splenocyte suspensions. This can be used at less than or equal to 0.06 μ g per million cells in a 100 μ l total staining volume. It is recommended that the antibody be carefully titrated for optimal performance in the assay of interest.
