Product Information

Contents: Affinity Purified anti-mouse CD117 (c-Kit, cKit) - neutralizing
Catalog Number: 14-1172
Sizes: 50 ug, 100 ug, 500 ug
Formulation: Phosphate buffer pH 7.2,
150 mM NaCl, 0.09% NaN_3
Storage Conditions: Store at 4°C.
Avoid repeated freeze/thaw cycles.
Clone: ACK2
Isotype: Rat IgG2b, κ

Available Formats of This Product				
Cat. No.	Format	Excite (nm)	Emit (nm)	Reported Applications
10-1172	APC-Cy7 anti-mouse CD117 (c-Kit, cKit)	633	760	FC
12-1172	PE anti-mouse CD117 (c-Kit, cKit)	488	575	FC
14-1172	Affinity Purified anti-mouse CD117 (c-Kit, cKit) - neutralizing	N/A	N/A	FA FC IH/F IP WB
15-1172	PE-Cy5 anti-mouse CD117 (c-Kit, cKit)	488	670	FC
16-1172	Functional Grade* Purified anti-mouse CD117 (c-Kit, cKit) - neutralizing	N/A	N/A	FA FC
17-1172	APC anti-mouse CD117 (c-Kit, cKit)	633	660	FC
25-1172	Phycoerythrin-Cy7 (PE-Cy7) anti-mouse CD117 (c-Kit, cKit) - neutralizing	488	760	FC

*Functional Grade™ (FG™): Azide-free, sterile-filtered, and endotoxin < 0.001 ng/µg.
Purified: Contains azide, not sterile-filtered, and not endotoxin tested.

Description

The ACK2 monoclonal antibody reacts with mouse CD117, also known as c-Kit receptor, Steel factor receptor and stem cell factor receptor. A member of the tyrosine kinase receptor family, this 145 kDa molecule is expressed by a majority of hematopoietic progenitor cells characterized in the mouse bone marrow as a small subset of cells positive for Sca-1 and Thy1 ($Thy1^{lo}$) and negative for lineage markers. The interaction of the mouse c-kit receptor and steel factor promotes the proliferation and differentiation of hematopoietic progenitor cells. CD117 is also expressed by mast cells and plays a role in signaling and activation of these cells. ACK2 has been reported to be a blocking antibody.

Usage

For research use only, not for diagnostic or therapeutic use. The ACK2 antibody has been reported for use in flow cytometric analysis, immunoprecipitation, immunoblotting (WB), and immunohistochemical staining of frozen tissue sections. It has also been reported for use in functional assays. (Please use Functional Grade purified ACK2, cat. 16-1172, in functional assays.)

Applications Tested

The ACK2 antibody has been tested by flow cytometric analysis of mouse bone marrow cell suspensions. This can be used at less than or equal to 0.125 µg per million cells in a 100 µl total staining volume. It is recommended that the antibody be carefully titrated for optimal performance in the assay of interest.
