

Product Information

Contents: Affinity Purified anti-mouse NK cell (Ly-49C/I/F/H)

Catalog Number: 14-5991

Sizes: 50 ug, 100 ug, 500 ug

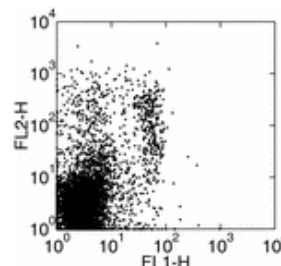

Formulation: Phosphate buffer pH 7.2,
150 mM NaCl, 0.09% NaN₃

Storage Conditions: Store at 4°C.

Avoid repeated freeze/thaw cycles.

Clone: 14B11

Isotype: Golden Syrian Hamster IgG

Two-color surface staining of mouse splenocytes with anti-mouse NK cell (14B11) PE and anti-mouse pan-NK (DX5) FITC. Total viable cells were used for analysis.

Description

The 14B11 monoclonal antibody reacts with a subset of mouse Ly-49 receptors and recognizes a majority of mouse NK cells. This antibody reacts with 3 putative inhibitory members of the Ly-49 family, F, I, and C and one putative activating receptor, Ly-49H. 14B11 does not react with Ly-49A, B, D, or G. It is reported that 14B11 enhances the redirected lysis of FcR⁺ target cells by IL-2-activated NK cells.

Usage

For research use only, not for diagnostic or therapeutic use. The 14B11 antibody has been reported for use in flow cytometric analysis. It has also been reported in functional studies. (Please use Functional Grade purified 14B11 in functional assays).

Applications Tested

The 14B11 antibody has been tested by flow cytometric analysis of mouse splenocyte suspensions. This can be used at less than or equal to 0.5 µg per million cells in a 100 µl total staining volume. It is recommended that the antibody be carefully titrated for optimal performance in the assay of interest.
