

Adenosine A3 Receptor Antibody

Catalog No.:	15-288-22082B
Quantity:	0.1 mg
Concentration:	1 mg/ml
Background:	A3 Adenosine Receptor is a widely expressed receptor that mediates the multiple functions of adenosine. For example, this receptor is believed to mediate the protective effect of adenosine released during cardiac ischemia. In lungs, the receptor mediates inhibition of eosinophil chemotaxis and may be useful in the treatment of eosinophil-dependent diseases such as asthma and rhinitis. Adenosine A3 Receptor has been reported mostly in brain, lung, liver, heart, kidney, and testis. ESTs have been isolated from heart/melanocyte/uterus, kidney, pituitary, and placenta libraries.
Host / Isotype:	Chicken
Immunogen:	Synthetic peptide - KLH conjugated
Format:	State: Liquid Purification: Immunogen affinity purified. Buffer System: Phosphate buffered saline, PH 7.7 containing 0.01% sodium azide
Applications:	IHC-P Other applications not tested. Optimal dilutions are dependent on conditions and should be determined by the user.
Specificity:	Human. Others not determined.
Storage:	Keep as concentrated solution. Store at 4

For research and in vitro use only. Not for diagnostic or therapeutic work.

Material Safety Datasheets are available at www.acris-antibodies.com or on request.
