

PAPK Antibody

Catalog No.: 15-288-22211A

Quantity: 0.1 mg

Concentration: 1 mg/ml

Background: A novel protein kinase, polyploidy-associated protein kinase (PAPK) is a new member of the Ste20/germinal center kinase family that modulates cytoskeletal organization and cell survival. Activation of a death signal transduction pathway may result in the stimulation of the PAPK promoter, which leads to increased PAPK expression and provides a negative feedback signal that prevents cell death.

Host / Isotype: Chicken

Format: **State:** Liquid
Purification: Affinity purified IgG
Buffer System: PBS containing 0.02% sodium azide.

Applications: ELISA, WB
Other applications not tested. Optimal dilutions are dependent on conditions and should be determined by the user.

Storage: Keep as concentrated solution. Store at 4

For research and in vitro use only. Not for diagnostic or therapeutic work.

Material Safety Datasheets are available at www.acris-antibodies.com or on request.
