

EBV antibody [0211]

Catalog No.:	15-288-22211B
Quantity:	0.1 mg
Concentration:	0.1 mg/ml
Background:	Epstein Barr virus (EBV) is a member of the herpesvirus family and one of the most common human viruses. Most people become infected with EBV during their lives. Primary infections usually results in infectious mononucleosis (glandular fever) but the virus can also lay dormant in B lymphocytes and when reactivated become associated with more serious disease such as Burkitt's lymphoma, nasopharyngeal carcinoma and Hodgkin's disease.
Host / Isotype:	Chicken
Immunogen:	Recombinant full length protein. EB nuclear antigen.
Format:	Purification: Protein A purified Buffer System: Preservative: 0.1% Sodium Azide. Constituents: 0.01M PBS. pH 7.2
Applications:	IHC, IP, WB Other applications not tested. Optimal dilutions are dependent on conditions and should be determined by the user.
Specificity:	Cross-reacts with EBV. Not yet tested in other species.
Storage:	Keep as concentrated solution. Store at 4

For research and in vitro use only. Not for diagnostic or therapeutic work.

Material Safety Datasheets are available at www.acris-antibodies.com or on request.
