

Quinidine antibody [501]

Catalog No.:	15-288-22268F
Quantity:	0.1 mg
Background:	Quinidine is a chemical that blocks cation channels in a reversible manner. It can be used in the treatment against Plasmodium falciparum malaria and it is used as an oral antiarrhythmic drug in converting recent onset atrial fibrillation.
Host / Isotype:	Chicken
Immunogen:	Quinidine conjugated to KLH.
Format:	State: Liquid Purification: Ascites Buffer System: Preservative: None. Constituents: Ascites
Applications:	ELISA Other applications not tested. Optimal dilutions are dependent on conditions and should be determined by the user.
Specificity:	Human - Not yet tested in other species
Storage:	Keep as concentrated solution. Store at 4

For research and in vitro use only. Not for diagnostic or therapeutic work.
