

Neisseria gonorrhoea antibody

Catalog No.:	15-288-23016
Quantity:	0.1 mg
Concentration:	4 mg/ml
Background:	<p>The genus Neisseria contains a number of species which are normal flora and pathogens of humans and animals. Of these species, the species of human origin, and particularly the pathogenic species, <i>N. gonorrhoeae</i> and <i>N. meningitidis</i>, have been studied extensively in an effort to control the infections they cause. Gonorrhea, caused by <i>N. gonorrhoeae</i>, is one of the most frequently reported infectious diseases in the United States and worldwide. Of the Neisseria and related species, only <i>N. gonorrhoeae</i> is considered always to be pathogenic i.e., cause disease. <i>N. gonorrhoeae</i> is not considered to be normal flora under any circumstances.</p>
Host / Isotype:	Chicken
Immunogen:	Tissue / cell preparation: Whole <i>N. gonorrhoeae</i> ; ATCC 31426.
Format:	Purification: IgG fraction Buffer System: Preservative: 0.1% Sodium Azide. Constituents: 10mg/ml BSA, 10mM PBS. pH 7.2 Label: Fluorescein
Applications:	ELISA, IF Other applications not tested. Optimal dilutions are dependent on conditions and should be determined by the user.
Specificity:	Cross-reacts with <i>Neisseria gonorrhoeae</i> . This antiserum has not been absorbed and may react with related microorganisms. Not yet tested in other species.
Storage:	Keep as concentrated solution. Store at 4

For research and in vitro use only. Not for diagnostic or therapeutic work.
