## Product Information

---

Contents: Purified anti-human A20  
Catalog Number: 60-6629  
Sizes: 50 ug, 100 ug  
Storage Conditions: Store at 4°C.  
Avoid repeated freeze/thaw cycles.  
Clone: 59A426  
Isotype: Mouse IgG1

---

60-6629	anti-human A20	N/A	N/A	WB

---

## Description

---

The 59A426 antibody reacts with human A20. The zinc finger protein A20 is a tumor necrosis factor and interleukin-1 (IL-1) inducible protein that negatively regulates NF-κB gene expression. A20 inhibits NF-κB dependent gene expression by interfering with a novel TNF-induced and RIP- or TRAF2-mediated pathway that is different from the NF-κB kinase pathway. Full-length recombinant A20 protein was used as an immunogen.

---

## Usage

---

For research use only, not for diagnostic or therapeutic use. The 59A426 antibody has been reported for use in immunoblotting (WB).

---

## Applications Tested

---

The 59A426 antibody has been tested by immunoblotting of whole cell lysate from Daudi cells and can be used at 1-2 µg/ml. A band at ~70 kDa is detected.
