
Product Information

Contents: Polyclonal anti-human DR6

Catalog Number: 60-6633

Sizes: 50 ug, 100 ug

Storage Conditions: This product is supplied as Protein G purified IgG fraction in PBS containing 0.02% sodium azide. Store at 4°C, stable for 6 months. For long-term storage, store at -20°C.

Clone: Polyclonal

Isotype: Rabbit IgG

60-6633	Polyclonal antibody to human DR6	N/A	N/A	WB

Description

The polyclonal antibody reacts with human DR6; the antibody was raised against a peptide of human DR6. DR6 (Death Receptor 6) is a novel member of the TNFR superfamily. The extracellular portion of DR6 has four TNFR-like cysteine rich motifs that are most related to those of osteoprotegerin (OPG) and TNFR2.

Usage

For research use only, not for diagnostic or therapeutic use. This polyclonal antibody has been reported for use in immunoblotting (WB).

Applications Tested

This polyclonal antibody has been reported for use in detection of DR6 expression by Western blotting at 2-4 µg/ml dilution. Whole cell lysate from HeLa cells can be used as a positive control and an approximately 60-66 kDa band should be detected. It is recommended that the reagent be carefully titrated for optimal performance in the assay of interest.
