

CATALOGUE #: 8CV28

PRODUCT NAME: Recombinant Cytomegalovirus Pp28 antigen

Description: Protein contains CMV Pp28 (UL99) immunodominant regions

Source: Recombinant protein is isolated from *E. coli* culture

Purification: Affinity chromatography on Glutathione sepharose

Presentation: 30 mM Phosphate buffer, containing NaCl, KCl, 10mM Glutathione, 50 % glycerol

Analysis: Purity > 95% (12% PAGE, coomassie staining)

Applications: ELISA, Western Blot, determination of IgG class antibodies specific to CMV

Storage: - 20 °C

Other information: Immunoreactive with sera of CMV-infected individuals

Some applications in which these products may be used are covered by patents issued and applicable in certain countries. Because purchase of these products does not include a license to perform any patented application, users of these products may be required to obtain a patent license, depending on the particular application and country in which the product is used.
