Polyclonal Antibody to Photobacterium Damselae Subspecies Piscicida - Purified

Catalog No.:	AM01198PU-N
Quantity:	0.2 mg
Background:	The disease is characterised by white bacterial colonies throughout the viscera especially the kidneys and spleen. The specificity of the antibody has been tested against several species of bacteria infecting fish, including Vibrio and Photobacterium damsela sub.sp. Damselae.
Host / Isotype:	Mouse / IgG2a
Format:	State: Lyophilized purified Ig Reconstitution: 1.0 ml phosphate buffered saline
Applications:	Immunohistochemistry on paraffin sections. Other applications not tested. Optimal dilutions are dependent on conditions and should be determined by the user.
Specificity:	This antibody recognises Photobacterium damsela subsp piscicida, the causitive agent of fish pasturellosis (also known as pseudotuberculosis).
Storage:	Store the antibody in aliquots at -20°C for longer. Avoid repeated freezing and thawing. Shelf life: one year from despatch.
