Monoclonal Antibody to St. Louis Encephalitis Virus -Purified

Catalog No.:	AM01225PU-N
Quantity:	0.1 mg
Concentration:	1.0 mg/ml
Background:	SLE is a flavivirus producing severe encephalitis in humans. The viral envelope contains a single glycoprotein serving as a major structural component of the virion spike.
Host / Isotype:	Mouse / IgG2a
Recommended Isotype Controls:	AM03096PU-N
Clone:	1b5d-1
Immunogen:	Purified SLE strain MSI-7. Spleen cells from immunised mice were fused with cells of the SP2/0 Ag 14 myeloma cell line.
Format:	State: Liquid purified Ig Buffer System: PBS containing 0.09% Sodium azide
Applications:	ELISA. Immunofluorescence. Other applications not tested. Optimal dilutions are dependent on conditions and should be determined by the user.
Specificity:	This antibody recognises the Saint Louis Encephalitis virus strain (MSI-7) envelope glycoprotein. The antibody cross reacts with other SLE strains and related flaviviruses as determined by immunofluorescence and haemagglutination assays.
Storage:	Store the antibody undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer. Avoid repeated freezing and thawing. Shelf life: one year from despatch.
General Readings:	 Roehrig JT, Mathews JH, Trent DW. Identification of epitopes on the E glycoprotein of Saint Louis encephalitis virus using monoclonal antibodies.
