Polyclonal Antibody to Streptococcus iniae - Purified

| | |
|------------------------|--|
| Catalog No.: | AM01229PU-N |
| Quantity: | 0.2 mg |
| Host / Isotype: | Mouse / IgG2a |
| Format: | State: Lyophilized purified Ig Reconstitution: 1.0 ml PBS |
| Applications: | ELISA. Immunohistochemistry on paraffin fixed sections. Other applications not tested. Optimal dilutions are dependent on conditions and should be determined by the user. |
| Specificity: | This antibody recognises Streptococcus iniae. A fish pathogen capable of causing Meningoencephalitis in tilapia and trout along with other fish. The product is a mixture of two clones recognising S.iniae, they have been tested against 8 isolates of S.iniae and tested positive on all. The specificity of the product has been tested against a range of bacteria which infect fish as well as other aquatic bacteria. However the pathogen results in a very different pathology (granuloma formation) compared with S.iniae enabling positive identification of S.iniae infection in fish. |
| Storage: | Store the antibody in aliquots at -20°C for longer. Avoid repeated freezing and thawing. Shelf life: one year from despatch. |
