

AM01278PU-N**Monoclonal Antibody to Interleukin-13 / IL13 - Purified**

Alternate names:	IL-13, NC30
Quantity:	0.5 mg
Concentration:	0.5 mg/ml
Background:	IL-13 is derived from activated TH-2 cells. It inhibits proinflammatory cytokine release and down regulates macrophage activity in response to gamma interferon or bacterial LPS.
Uniprot ID:	P35225
NCBI:	NP_002179.2
GeneID:	3596
Host / Isotype:	Rat / IgG2a
Recommended Isotype Controls:	SM15P, SM15PX
Clone:	JES10-35G12
Format:	State: Liquid purified Ig Buffer System: Borate buffered saline
Applications:	ELISA. Other applications not tested. Optimal dilutions are dependent on conditions and should be determined by the user.
Specificity:	This antibody recognises interleukin 13 (IL-13). Species: Human. Other species not tested.
