AM08124PU-N Monoclonal Antibody to MHC Class II (I-A) - Purified

Quantity: 0.5 mg
Concentration: 0.5 mg/ml

Background: The Chicken Ia antigen is expressed on B cells, a subpopulation of the

monocyte/macrophage lineage of cells, and mitogen-activated T cells. (Ref.1)

Host / Isotype: Mouse / IgM

Recommended Isotype

Controls:

SM13P

Clone: Cla-I

Format: State: Liquid purified lg fraction.

Buffer System: 100 mM Borate Buffered Saline, pH 8.2. No preservatives or amine-containing buffer salts added.

Applications: Flow Cytometry: Identification and enumeration of Ia+ cells. (Ref.1)

Immunoprecipitation. (Ref.1)
Inhibition of MLR. (Ref.1)

Other applications not tested. Optimal dilutions are dependent on conditions and

should be determined by the user.

Specificity: This antibody recognizes a 65 kDa glycoprotein consisting of a 32 kDa alpha-chain

non-covalently bound to a 27 kDa beta-chain.

The molecule recognized by this antibody is similar in structure to the murine la

antigens and human DR antigens.

Species: Chicken.

Other species not tested.

Storage: Store the antibody undiluted at 2-8°C for one month or (in aliquots) at -20°C for

longer.

Avoid repeated freezing and thawing. Shelf life: one year from despatch.
