

AM31391PU-N**Monoclonal Antibody to Serum Amyloid A protein (SAA) - Purified****Alternate names:** SAA1, SAA2**Quantity:** 1 mg**Concentration:** 5.0 mg/ml (OD280nm, E^{0.1%}=1.4)

Background: The Serum Amyloid A (SAA) family comprises a number of differentially expressed lipoproteins, acute phase SAA1 and SAA2, the former being a major component in plasma, and constitutive SAA's (C-SAAs). Although the liver is the primary site of synthesis of both SAA types, extrahepatic production has been reported. The in vivo concentrations increase by as much as 1000 fold during inflammation. Several studies have expressed its importance in the diagnosis and monitoring of various diseases. Pathological SAA values are often detected in association with normal CRP concentrations. SAA rises earlier and more sharply than CRP. SAA enhances the binding of HDL's to macrophages and thus helps the delivery of lipid to sites of injury for use in tissue repair. It is thus thought to be an integral part of the disease process. In addition, recent experiments suggest that SAA may play a "housekeeping" role in normal human tissues. Elevated levels of SAA over time predispose secondary amyloidosis, extracellular accumulation of amyloid fibrils, derived from a circulating precursor, in various tissues and organs. The most common form of amyloidosis occurs secondary to chronic inflammatory disease, particularly rheumatoid arthritis.

Uniprot ID: [P02735](#)**NCBI:** [NP_000322](#)**GeneID:** [6288](#)**Host / Isotype:** Mouse / IgG1**Recommended Isotype Controls:** SM10P (for use in human samples), AM03095PU-N**Clone:** B336A**Immunogen:** Human recombinant SAA, conjugated with carrier protein
Remarks: Source: Ascites**Format:** **State:** Liquid purified Ig fraction (>90% pure by SDS-PAGE)
Purification: Affinity Chromatography on Protein A
Buffer System: PBS, pH 7.4 containing 0.09% Sodium Azide as preservative**Applications:** **ELISA.**
Western Blot.
Recommended pairs for Sandwich Immunoassay:
Capture / Detection
AM31393PU-N / AM31391PU-N
AM31392PU-N / AM31391PU-N
AM31391PU-N / AM31393PU-N

Other applications not tested. Optimal dilutions are dependent on conditions and should be determined by the user.

Specificity:

This antibody recognizes native and recombinant Serum Amyloid A (SAA).

Species: Human.

Other species not tested.

Storage:

Store the antibody undiluted at 2-8°C.

Shelf life: one year from despatch.
