AM33324PU-N Monoclonal Antibody to Human IgM (heavy chain) - Purified

Alternate names:	Human Immunoglobulin M	
Quantity:	0.2 mg	
Concentration:	0.2 mg/ml	
Host / Isotype:	Mouse / IgG2b	
Recommended Isotype Controls:	SM12P, AM03110PU-N	
Clone:	IM373	
Immunogen:	Recombinant heavy chain of Human IgM. Genename: IGHM	
Format:	State: Liquid purified IgG fraction from Bioreactor Concentrate Purification: Protein A/G Chromatography Buffer System: 10mM PBS Preservatives: 0.05% Sodium Azide Stabilizers: 0.05% BSA	
Applications:	 ELISA: Use Antibody without BSA for Coating. Flow Cytometry: 0.5-1 μg/10⁶ cells. Immunofluorescence: 0.5-1 μg/ml. Western Blot: 0.5-1 μg/ml. Immunoprecipitation: 0.5-1 μg/500 μg protein lysate. Immunohistochemistry on Frozen and Formalin-Fixed Sections: 0.5-1 μg/ml for 30 minutes at RT. Staining of formalin-fixed tissues requires boiling tissue sections in 10mM citrate buffer, pH 6.0, for 10-20 min followed by cooling at RT for 20 minutes. <i>Recommended Positive Control</i>: 293T, Raji or hPBL cells, Tonsil or Spleen. Other applications not tested. Optimal dilutions are dependent on conditions and should be determined by the user. 	
Molecular Weight:	50-75kDa	
Specificity:	Recognizes a protein of 75kDa, identified as mu heavy chain of Human immunoglobulins. It does not cross-react with alpha (IgA), gamma (IgG), epsilon (IgE), or delta (IgD), heavy chains, T-cells, monocytes, granulocytes, or erythrocytes. This Monoclonal Antibody is useful in the identification of leukemias, plasmacytomas, and certain non-Hodgkin's lymphomas. The most common feature of these malignancies is the restricted expression of a single heavy chain class. Demonstration of clonality in lymphoid infiltrates indicates that the infiltrate is clonal and therefore malignant. <i>Cellular Localization</i> : Cytoplasm, Cell Surface and Secreted. Species: Human. Other species not tested.	

For research and in vitro use only. Not for diagnostic or therapeutic work. Material Safety Datasheets are available at www.acris-antibodies.com or on request.

	AM33324PU-N: Monoclonal Antibody to Human IgM (heavy chain) - Purified	
Storage:	Store undiluted at 2-8°C. Shelf life: one year from despatch.	
General Readings:	1. Baryshnikov Alu. [Monoclonal antibodies of the ICO series against differentiation antigens of human lymphocytes]. Gematol Transfuziol. 1990 Aug;35(8):4-7. PubMed PMID: 2253863.	
Pictures:	Formalin-paraffin human tonsil stained with IgM MAb (Clone IM373)
