## AM50120PU-T Monoclonal Antibody to Human Kappa Light Chain - Purified

| Alternate names:                 | HCAK1, IGKC, Ig Kappa Chain C Region, Immunoglobulin KM   |
|----------------------------------|---|
| Quantity:                        | 20 µg   |
| Concentration:                   | 0.2 mg/ml   |
| Host / Isotype:                  | Mouse / IgG1  |
| Recommended Isotype<br>Controls: | SM10P (for use in human samples), AM03095PU-N   |
| Clone:                           | SPM558  |
| Immunogen:                       | Recombinant Human Ig kappa chain.<br><b>Genename:</b> IGKC  |
| Format:                          | State: Liquid purified IgG fraction from Bioreactor Concentrate<br>Purification: Protein A/G Chromatography<br>Buffer System: 10mM PBS<br>Preservatives: 0.05% Sodium Azide<br>Stabilizers: 0.05% BSA   |
| Applications:                    | <ul> <li>ELISA: Use Antibody without BSA for Coating.</li> <li>Flow Cytometry: 0.5-1 μg/10<sup>6</sup> cells.</li> <li>Western Blot: 0.5-1 μg/ml.</li> <li>Immunoprecipitation: 1-2 μg/500 μg protein lysate.</li> <li>Immunohistochemistry on Frozen and Formalin-Fixed Paraffin Sections: 0.5-1 μg/ml for 30 min at RT.</li> <li>Staining of formalin-fixed tissues requires boiling tissue sections in 10mM Citrate buffer, pH 6.0, for 10-20 min followed by cooling at RT for 20 min.</li> <li><i>Positive Control</i>: 293T, Raji or hPBL cells, Tonsil or Spleen.</li> <li>Other applications not tested. Optimal dilutions are dependent on conditions and should be determined by the user.</li> </ul>   |
| Molecular Weight:                | ~22.5kDa  |
| Specificity:                     | This Monoclonal Antibody is specific to Kappa Light chain of immunoglobulin and<br>shows no cross-reaction with Lambda Light chain or any of the five heavy chains. In<br>mammals, the two light chains in an antibody are always identical, with only one type<br>of light chain, kappa or lambda. The ratio of Kappa to Lambda is 70:30. However, with<br>the occurrence of multiple myeloma or other B-cell malignancies this ratio is<br>disturbed. Antibody to the kappa light chain is reportedly useful in the identification<br>of leukemias, plasmacytomas, and certain non-Hodgkin's lymphomas. Demonstration<br>of clonality in lymphoid infiltrates indicates that the infiltrate is malignant.<br><u><i>Cellular Localization</i></u> : Cell Surface, cytoplasmic and secreted.<br><b>Species:</b> Human.<br>Other species not tested. |
| Storage:                         | Store undiluted at 2-8°C.<br>Shelf life: one year from despatch.  |

For research and in vitro use only. Not for diagnostic or therapeutic work. Material Safety Datasheets are available at www.acris-antibodies.com or on request.
