Polyclonal Antibody to Homocysteine - Serum

Catalog No.:	AP05362SU-N
Quantity:	0.1 ml
Host / Isotype:	Rabbit / IgG
Immunogen:	Homocysteine-glutaraldehyde-BSA
Format:	State: Lyophilized serum Reconstitution: Restore in 50 µl distilled water + 50 µl glycerol.
Applications:	ELISA: 1/5000 - 1/10,000. Other applications not tested. Optimal dilutions are dependent on conditions and should be determined by the user.
Specificity:	This antibody recognises homocysteine, a homologue of the amino acid cysteine. Elevated levels in the blood are associated with a number of disease states. This antibody has been adsorbed against BSA but only recognises conjugated homocysteine, not free homocysteine.
Storage:	Prior to reconstitution store at 2-8°C. After reconstitution store at -20°C. Storage in frost-free freezers is not recommended. This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use. Shelf life: One year from despatch.
