Polyclonal Antibody to Trans-Hydroxyproline - Serum

Catalog No.:	AP05363SU-N
Quantity:	0.1 ml
Host / Isotype:	Rabbit / IgG
Immunogen:	Trans-hydroxyproline-BSA conjugate.
Format:	State: Lyophilised purified IgG Reconstitution: Reconstitute using 50µl distilled water + 50µl glycerol
Applications:	ELISA: 1:2000 - 1:5000. Other applications not tested. Optimal dilutions are dependent on conditions and should be determined by the user.
Specificity:	This antibody recognises trans-hydroxyproline, an amino acid isomer formed by the hydroxylation of proline which can influence the tertiary structure and stability of peptides. This antibody has been adsorbed against BSA but only recognises conjugated trans-hydroxyproline, not free trans-hydroxyproline.
Storage:	Prior to reconstitution store at 2-8°C. Following reconstitution store the antibody at -20°C. Avoid repeated freezing and thawing. Shelf life: one year from despatch.
