Polyclonal Antibody to Tetrodotoxin conjugate - Purified

Catalog No.:	AP05367PU-N
Quantity:	0.1 ml
Background:	Tetrodotoxin is a potent neurotoxin that binds to the pores of voltage gated, fast sodium channels and has been used in the treatment of pain and cardiac arrhythmias.
Host / Isotype:	Rabbit / IgG
Immunogen:	Tetrodotoxin-glutaraldehyde-BSA conjugate.
Format:	State: Lyophilised purified IgG Reconstitution: Reconstitute with 50µl distilled water + 50µl glycerol
Applications:	ELISA: 1/2000 - 1/5000. Other applications not tested. Optimal dilutions are dependent on conditions and should be determined by the user.
Specificity:	This antibody recognises tetrodotoxin conjugated to glutaraldehyde-BSA and shows little cross-reactivity with unconjugated tetrodotoxin.
Storage:	Prior to and following reconstitution store the antibody at -20°C. Avoid repeated freezing and thawing. Shelf life: one year from despatch.
