

**AP09830PU-N****Polyclonal Antibody to Sulphapyridine - Ig Fraction**

|                         |                                                                                                                                                                                                                                |
|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Alternate names:</b> | 2-Sulfapyridine, 4-amino-N-pyridin-2-ylbenzenesulfonamide, Coccoclase, Eubasinum, Piridazol, Pyridazol, Relbapiridina, Septipulmon, Sulfapyridine, Sulfidine                                                                   |
| <b>Quantity:</b>        | 0.1 ml                                                                                                                                                                                                                         |
| <b>Concentration:</b>   | 10mg/ml (U.V.abs @ 280nm)                                                                                                                                                                                                      |
| <b>Host / Isotype:</b>  | Sheep / IgG                                                                                                                                                                                                                    |
| <b>Immunogen:</b>       | Sulphapyridine-HSA                                                                                                                                                                                                             |
| <b>Format:</b>          | <b>State:</b> Liquid Ig fraction prepared by Caprylic Acid and Ammonium Sulphate precipitation procedures<br><b>Buffer System:</b> 20mM Phosphate, 150mM Sodium Chloride, pH 7.2 containing 0.09% Sodium Azide as preservative |
| <b>Applications:</b>    | ELISA: 10µg/ml.<br>Other applications not tested. Optimal dilutions are dependent on conditions and should be determined by the user.                                                                                          |
| <b>Specificity:</b>     | This antibody reacts to Sulphapyridine.                                                                                                                                                                                        |
| <b>Storage:</b>         | Store the antibody at -20°C.<br>Avoid repeated freezing and thawing.<br>Shelf life: one year from despatch.                                                                                                                    |
