AP21394PU-N Polyclonal Antibody to Triosephosphate isomerase (TPI1) - Aff -

Purified

Alternate names: TIM, TPI, Triose-phosphate isomerase

Quantity: 1 mg

 Concentration:
 2,0 mg/ml

 Uniprot ID:
 P00942

 NCBI:
 NP 010335

 GeneID:
 851620

 Host / Isotype:
 Rabbit / IgG

Immunogen: Triosephosphate isomerase isolated and purified from baker's yeast. Freund's

complete adjuvant is used in the first step of the immunization procedure.

Format: State: Lyophilized purified hyperimmune IgG fraction

Purification: Solid Phase Affinity Chromatography

Buffer System: PBS, pH 7.2 stabilized with Dextran without preservatives and foreign

proteins

Reconstitution: Restore by adding 0.5 ml of sterile distilled water

Applications: Can be used in precipitating and non-precipitating antibody-binding assays (such as

e.g., ELISA and Western blotting and immunofluorescence or histochemical

techniques); to prepare an insoluble immuno-affinity adsorbent; for labelling with a

marker of the customer's own choice.

Recommended working dilutions: vary widely, but may be between 1/1000 and

1/30000.

Other applications not tested. Optimal dilutions are dependent on conditions and

should be determined by the user.

Specificity: The reagents were evaluated for potency, purity and specificity using most or all of the

following techniques: immunoelectrophoresis, cross-immunoelectrophoresis, single radial immunodiffusion (Ouchterlony), block titration, ELISA, immunoblotting and

enzyme inhibition.

Storage: Prior to and following reconstitution store the antibody at 2-8°C for one month or at

-20°C for longer.

Avoid repeated freezing and thawing. Shelf life: one year from despatch.
