

**AP21418PU-N****Polyclonal Antibody to Phosphateacetyltransferase - Aff - Purified**

<b>Alternate names:</b>	Phosphotrans Acetylase, pta
<b>Quantity:</b>	1 mg
<b>Concentration:</b>	2.0 mg/ml
<b>Host / Isotype:</b>	Rabbit / IgG
<b>Immunogen:</b>	Phosphotransacetylase isolated and purified from <i>Clostridium kluveri</i> . Freund's complete adjuvant is used in the first step of the immunization procedure.
<b>Format:</b>	<b>State:</b> Lyophilized purified hyperimmune IgG fraction <b>Purification:</b> Solid Phase Affinity Chromatography <b>Buffer System:</b> PBS (pH 7.2), stabilized with Dextran, without preservatives and foreign proteins <b>Reconstitution:</b> Restore by adding 0.5 ml of sterile distilled water
<b>Applications:</b>	This product is intended for use in precipitating and non-precipitating antibody-binding assays (such as e.g., ELISA and Western blotting and Immunofluorescence or Histochemical techniques), to prepare an insoluble immuno-affinity adsorbent, for labelling with a marker of choice. <u>Working Dilutions:</u> Non-precipitating antibody-binding techniques: 1/100-1/2,000. Other applications not tested. Optimal dilutions are dependent on conditions and should be determined by the user.
<b>Specificity:</b>	The reagents were evaluated for potency, purity and specificity using most or all of the following techniques: Immunoelectrophoresis, Cross-Immunoelectrophoresis, single Radial Immunodiffusion (Ouchterlony), block titration, ELISA, Immunoblotting and Enzyme Inhibition. Cross-reactivities against enzymes of other sources may occur but have not been determined. <b>Species:</b> <i>Clostridium kluveri</i> . Other species not tested.
<b>Storage:</b>	Store the antibody lyophilized at 2-8°C and reconstituted at 2-8°C for one week or (in aliquots) at -20°C for longer. If a slight precipitation occurs upon storage, this should be removed by centrifugation. Shelf life: one year from despatch.
