AP26433AF-N Polyclonal Antibody to HIV-1 - Azide Free

Alternate names:	HIV-I, HIV1, Human immunodeficiency virus type 1
Quantity:	1 mg
Background:	There are two major types of human immunodeficiency virus: HIV-1 and HIV-2. HIV-1 is originated from primate, and is more common and more virulent. HIV-1 is further divided into groups. 90% of HIV infection is caused by HIV-1 group M virus. There are 39 open reading frames on the HIV-1 genome, encoding a variety of structural and non- structural HIV proteins.
Host:	Goat
Immunogen:	Viral lysate of highly purified human immunodeficiency virus 1
Format:	State: Lyophilized Ig fraction Purification: Protein G purified Buffer System: 0.02M PBS, PH7.4 Reconstitution: Reconstitute in distilled water to desired concentration.
Applications:	Western blot. ELISA. Other applications not tested. Optimal dilutions are dependent on conditions and should be determined by the user.
Specificity:	This antibody recognizes p17, p24, p45, p53, p55, p64, p120 and gp160 on Western blot. P17, p24 and p64 showed strong positive bands.
Storage:	Upon receipt, store undiluted (in aliquots) at -20°C. Avoid repeated freezing and thawing. Shelf life: one year from despatch.

For research and in vitro use only. Not for diagnostic or therapeutic work. Material Safety Datasheets are available at www.acris-antibodies.com or on request.
