

**AP33036SU-N****Polyclonal Antibody to Naproxen - Serum**

<b>Quantity:</b>	0.1 ml
<b>Concentration:</b>	10 mg/ml
<b>Background:</b>	Naproxen is a non-steroidal anti-inflammatory drug (NSAID) used for pain relief, fever reduction and against swelling. Apparently, it also has some anti-viral activity. It belongs to the most sold over-the-counter drugs. It is found in the environment, especially in the water environment in the neighbourhood of large cities and hospitals.
<b>Host / Isotype:</b>	Rabbit / IgG
<b>Immunogen:</b>	BSA-Naproxen derivate Conjugate. Chicken egg yolk, purified by PEG extraction.
<b>Format:</b>	<b>State:</b> Liquid Serum <b>Stabilizers:</b> None
<b>Applications:</b>	<b>ELISA:</b> Dilution of 1/2,000 from the delivered immune serum (The titer is defined as the dilution that gives 50% of the absorbance from the maximum absorbance when tested with ELISA). <i>Suggested concentration:</i> 1/2,000 from the delivered solution. Plates are coated with 400 ng/ml OVA-derivative. HRP-conjugated anti-Rabbit IgG as a tracer 1/8,000 Immunogen BSA-Derivative conjugate <b>Immunoaffinity Chromatography:</b> Antibody can be coupled to solid support materials. Other applications not tested. Optimal dilutions are dependent on conditions and should be determined by the user.
<b>Specificity:</b>	This antibody is specific for Naproxen <b>Target:</b> Naproxen, <i>CAS no.:</i> 22204-5-1, Solubility: Organic solvents, PEGs. <b>Compound tested (% Cross Reactivity):</b> Naproxen (100%), Bezafibrate (5%), Gemfibrozil (8%), Bisphenol A (5%), Ibuprofen (9%), Clofibrinic acid (5%), Metoprolol (6%), Diclofenac (4%), Erythromycine (3%), Octylphenol (10%), Fenofibrate (6%), Propanolol (6%).
<b>Storage:</b>	Store undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer. Add 0.02% Sodium Azide for long storage. Avoid repeated freezing and thawing. Shelf life: one year from despatch.
