

Polyclonal Antibody to SFTS Virus HB29 (N-term) - Aff - Purified

Alternate names:	SFTS Virus HB29 Membrane Glycoprotein Polyprotein
Catalog No.:	AP55664PU-N
Quantity:	0.1 mg
Concentration:	1.0 mg/ml
Background:	Severe fever with thrombocytopenia syndrome (SFTS) is an emerging infectious disease caused by SFTS virus, a newly discovered bunyavirus that can cause high rates of fatalities. This disease is thought to be transmitted through blood contact. The SFTS virus HB29 membrane glycoprotein polyprotein mRNA encodes two glycoproteins termed Phlebovirus glycoprotein G1 and G2 respectively.
Uniprot ID:	F1BA47
NCBI:	ADZ04471
GeneID:	13231111
Host / Isotype:	Rabbit / IgG
Immunogen:	A 19 amino acid synthetic peptide near the amino terminus of Human SFTS Virus HB29 Membrane Glycoprotein .
Format:	State: Liquid purified Ig fraction Purification: Affinity chromatography purified via peptide column Buffer System: PBS containing 0.02% Sodium Azide as preservative
Applications:	This antibody can be used for detection of SFTS Virus HB29 Membrane Glycoprotein by ELISA . It will detect 10 ng of <i>free</i> peptide at 1 µg/ml. Other applications not tested. Optimal dilutions are dependent on conditions and should be determined by the user.
Specificity:	This antibody is specific to the SFTS Virus HB29. It will detect the G1 glycoprotein. Species: Virus Other species not tested.
Storage:	Store undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer. Avoid repeated freezing and thawing. Shelf life: one year from despatch.
