Human Lung Tryptase antigen - Purified

Catalog No.:	AR05114PU-N
Quantity:	0.1 mg
Concentration:	1.0 mg/ml
Species:	Human
Source:	Human
Format:	State: Liquid purified protein Buffer System: Sodium Acetate pH 5 containing 1M NaCl, 0.05mM Heparin
Applications:	ELISA. Other applications not tested. Optimal dilutions are dependent on conditions and should be determined by the user.
Description:	Human Lung tryptase is a serine protease present in mast cells. It is released when the mast cells are activated and is thought to be a causative agent of asthma. Active Lung tryptase forms a tetramer stabilized by heparin, which dissociates into inactive monomers when heparin is not present.
Storage:	Store the protein at -20°C. Avoid repeated freezing and thawing. Shelf life: one year from despatch.
Caution:	(A full Health and Safety assessment is available upon request). This product has been donor-tested and found to be negative for HIV 1 and 2 antibodies, hepatitis B core and surface antigen antibodies, HCV antibodies and Syphilis.
