## Salmon Calcitonin Acetate - Purified

Catalog No.: AR10438PU-S

Quantity: 1 mg

Background: Calcitonin (CT) is a peptide hormone produced by the parafollicular cells of the thyroid

gland in mammals and by the ultimobranchial gland of birds and fish. Salmon calcitonin (sCT), which is more potent and longer lasting than human CT, has been used widely for the treatment of osteoporosis, paget's disease, hypercalcemic shock and chronic pain in terminal cancer patients. sCT is one of the many bioactive peptides that require C-terminal

amidation for full Biological activity.
