

Chlamydia trachomatis HSP70 (462-503) - Purified

Catalog No.:	AR10483PU-L
Quantity:	1 mg
Background:	Chlamydia is a common term for infection with any bacterium belonging to the phylum Chlamydiae. This term derives from the name of the bacterial genus Chlamydia in the family Chlamydiaceae, order Chlamydiales, class and phylum Chlamydiae. There are two genera in Chlamydiaceae: Chlamydia and Chlamydophila. The genus Chlamydia includes three species: <i>C. trachomatis</i> , <i>C. muridarum</i> , and <i>C. suis</i> .
Source:	<i>E. coli</i>
Format:	Purity: >95% pure as determined by 10% PAGE (coomassie staining) and RP-HPLC. Purification Method: Chlamydia HSP70 protein was purified by proprietary chromatographic technique. Buffer System: 50mM Tris-HCl, pH 8.0, 8M Urea, 60 mM NaCl and 50% Glycerol
Applications:	Chlamydia HSP70 protein is suitable for use in ELISA. Other applications not tested. Optimal dilutions are dependent on conditions and should be determined by the user.
Description:	The <i>E. coli</i> derived recombinant protein contains Chlamydia Trachomatis HSP70 protein epitopes, 462-503 amino acids. Specificity: Immunoreactive with sera of Chlamydia Trachomatis infected individuals.
Storage:	Store undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer. Avoid repeated freezing and thawing. Shelf life: one year from despatch.
