## SARS Nucleocaspid (1-49) - Purified

Catalog No.: AR10690PU-N

Quantity: 0.5 mg
Concentration: 1.0 mg/ml

Background: SARS Coronavirus is an enveloped virus containing three outer structural proteins, namely

the membrane (M), envelope (E), and spike (S) proteins. Spike (S)-glycoprotein of the virus interacts with a cellular receptor and mediates membrane fusion to allow viral entry into susceptible target cells. Accordingly, S-protein plays an important role in virus infection

cycle and is the primary target of neutralizing antibodies.

Source: E. coli

Format: Purity: Protein is >95.0% pure as determined by 10.0% PAGE (coomassie staining).

**Purification Method:** Sepharose-Derived Purification. **Buffer System:** 50mM Tris-HCl, 60mM NaCl, 50% Glycerol

Applications: Antigen in ELISA and Western blots, excellent antigen for detection of SARS with minimal

specificity problems.

Other applications not tested. Optimal dilutions are dependent on conditions and should

be determined by the user.

**Description:** The *E.coli* derived 32 kDa recombinant protein contains the Nucleocapsid core protein 1-49

amino acids immunodominant regions.

Specificity: Immunoreactive with sera of SARS-infected individuals.

Store undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer.

Avoid repeated freezing and thawing. Shelf life: one year from despatch.
