

AR39146PU-N**Human DENR / DRP1 (1-198, His-tag) - Purified**

Alternate names:	DRP, Density-regulated protein, H14, SMAP-3, Smooth muscle cell-associated protein 3
Quantity:	0.1 mg
Concentration:	0.5 mg/ml (determined by Bradford assay)
Background:	DENR may be involved in the translation of target mRNAs by scanning and recognition of the initiation codon. This protein plays a role in the modulation of the translational profile of a subset of cancer-related mRNAs when recruited to the translational initiation complex by the oncogene MCTS1.
