

AR50044PU-N

Human ARL14 / ARF7 (1-192, His-tag) - Purified

Alternate names:

ADP-ribosylation factor 7, ADP-ribosylation factor-like protein 14

Quantity:

0.5 mg

Concentration:

0.25mg/ml (determined by Bradford assay)

Background:

ARL14 (ADP-ribosylation factor-like 14) is a developmentally regulated member of the ADP-ribosylation factor/ARF-like protein (ARF/ARL) family of Ras-related GTPases. MHC class II molecules (MHC-II) present peptides to T helper cells to facilitate immune responses and are strongly linked to autoimmune diseases. MHC-II transport was controlled by the GTPase ARL14/ARF7, which recruits the motor myosin 1E via an effector protein ARF7EP.
