

AR50682PU-N

Human Calmodulin-like protein 3 (1-149, His-tag) - Purified

Alternate names:

CALML3, CaM-like protein, Calmodulin-related protein NB-1

Quantity:

0.5 mg

Concentration:

0.5 mg/ml (determined by Bradford assay)

Background:

CALML3 belongs to the calmodulin family and contains 4 EF-hand domains. This protein may be similar to that of authentic calmodulin and may actually compete with calmodulin by binding, with different affinities, to cellular substrates. CALML3 is expressed in normal mammary, prostate, cervical, and epidermal tissues.
