

AR51131PU-N**Human PET117 (23-81, His-tag) - Purified**

Alternate names:	Protein PET117 homolog, mitochondrial
Quantity:	0.25 mg
Concentration:	0.25mg/ml (determined by Bradford assay)
Background:	Protein PET117 homolog, mitochondrial, also known as PET117, is nuclear gene. PET117 is required for the assembly of active cytochrome c oxidase in <i>S. cerevisiae</i> , yet their gene products are not subunits of the final assembled cytochrome c oxidase complex. PET117 is located on chromosome V near the HIS1 gene.
