Respiratory Syncytial Virus (RSV) Long Strain - Purified

Catalog No.:	BIN100
Quantity:	1 ml
Concentration:	0.45 mg/ml (BCA Method)
Source:	FRhK cells
Format:	State: Liquid purified fraction. Purity: Ultra centrifugation of virus from infected cells. Buffer System: PBS, pH 7.3 to 7.7, containing no preservatives.
Applications:	Suitable for use in ELISA. Other applications not tested. Optimal dilutions are dependent on conditions and should be determined by the user.
Description:	Respiratory Syncytial Virus (RSV) Antigen, Long Strain Inactivation: UV light. Negative infectivity for RSV virus is defined as the inability of an inactivated virus preparation to produce CPE after seven days of incubation on a monolayer of FRhK cells. Results: negative
Storage:	Store at -70°C. Avoid multiple freeze/thaw cycles. Shelf life: six months from despatch.
Caution:	No test guarantees a product to be non-infectious. All material should be handled as if potentially infectious. Generally accepted laboratory practices appropriate for infectious materials should be employed when handling this product.

For research and in vitro use only. Not for diagnostic or therapeutic work. Material Safety Datasheets are available at www.acris-antibodies.com or on request. Acris Antibodies is now part of the OriGene family. Learn more at www.origene.com
