

BIN181**Influenza A H1N1 Strain A/Beijing/262/95 - Purified**

Alternate names:	Seasonal Flu H1N1
Quantity:	1 mg
Concentration:	0.85 mg/ml (BCA Method)
Source:	Chicken eggs, Allantoic fluid of 10 day old embryonated eggs inoculated with influenza A virus. Strain: A/Beijing/262/95
Format:	State: Liquid purified fraction (>90% pure by 7.5% SDS-PAGE). Purity: Ultracentrifugation using 10-40% sucrose gradient. Buffer System: 0.05 M Tris-HCl, pH 8.0 containing 0.1 M Sodium chloride, 5 mM EDTA as buffer and 0.09% Sodium Azide and 0.005% Thimerosal as preservatives.
Applications:	Serological studies of influenza A virus, immunogen for antibody production. Has been tested with MAb to Influenza A in ELISA. Other applications not tested. Optimal dilutions are dependent on conditions and should be determined by the user.
Description:	Influenza Virus, Type A (H1N1), Strain A/Beijing/262/95 Inactivation: 0.005% Thimerosal
Storage:	Store the antigen at 2-8°C for one month or (in aliquots) at -20°C for longer. Avoid multiple freeze/thaw cycles. Shelf life: six months from despatch.
Caution:	This product has been treated in a manner consistent with methods of inactivation. Generally accepted good laboratory practices appropriate to microbiological/viral safe handling practices and techniques are required when handling this product.
