Monoclonal Antibody to Nuclear Antigen (Membrane) - Supernatant

Alternate names: Nuclear membrane marker

Catalog No.: BM2231

Quantity: 2 ml

Host / Isotype: Mouse / IgG

Clone: AE-5

Format: **State:** Liquid supernatant.
Buffer System: RPMI-1640, pH 7.2 with 0.09% Sodium Azide as preservative.

Applications: This antibody may be used to stain nuclear membranes in cells, tissue preparations or subcellular fractions.
The antibody works well with cells and tissue sections fixed with 2% paraformaldehyde. Tonsil is the recommended positive control tissue.
Use this antibody without dilution.
Other applications not tested. Optimal dilutions are dependent on conditions and should be determined by the user.

Specificity: This antibody recognizes an antigen associated with the nuclear membrane in Human Cells.

Storage: Store the antibody undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer. Avoid repeated freezing and thawing.
Shelf life: one year from despatch.
