# Monoclonal Antibody to Hemoglobin F (intact) - Azide

Free

Catalog No.: BM2514

Quantity: 0.25 mg

Host / Isotype: Mouse / IgG1

Clone: HBF1

Immunogen: Purified human fetal Hemoglobin.

Format: State: Liquid purified Ig fraction.

Purification: Protein A chromatography.

**Buffer System:** PBS buffer, pH 7.4 with 0.09% sodium azide as preservative.

**Applications:** ELISA.

Flow Cytometry.

Direct Immunofluorescence Microscopy.

Immunohistochemistry. Western blotting.

Other applications not tested. Optimal dilutions are dependent on conditions and should

be determined by the user.

**Specificity:** Reacts with human fetal hemoglobin molecule in its intact form.

Binding is not observed for purified fetal hemoglobin alpha or gamma globulin chains

alone.

Reactivity is seen with human fetal erythrocytes, adult F cells, and nucleated red cells precursors containing HbF. No binding is observed with other forms of human hemoglobin,

including HbA, HBA2, HBA1C, HbS and HbE.

Store the antibody undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer.

Avoid repeated freezing and thawing. Shelf life: one year from despatch.
