

## Polyclonal Antibody to HA (Hemagglutinin) Epitope Tag

|                         |  |
|-------------------------|--|
| <b>Alternate names:</b> | HA Tag, HA-Tag, Hemagglutinin Tag          |
| <b>Catalog No.:</b>     | DP3066                                     |
| <b>Quantity:</b>        | 0.5 mg                                     |
| <b>Concentration:</b>   | 1.0 mg/ml                                  |
| <b>Host:</b>            | Rabbit                                     |
| <b>Immunogen:</b>       | Synthetic peptide of sequence CYPYDVDPYASL |

Format: This antibody is supplied as liquid, Protein A affinity purified immunoglobulin fraction in 10mM PBS with 0.09% sodium azide as preservative and 0.2% BSA as stabilizer.

|                      |   |
|----------------------|---|
| <b>Applications:</b> | Western Blotting (5-10 µg/ml for 2hrs at RT; Recommended positive control: Proteins displaying the YPYDVDPYA HA-tag). Immunoprecipitation (10 µg/mg protein lysate; Use Protein A). Other applications not tested. Optimal dilutions of this antibody are dependent on conditions and should be determined by the user.<br>Other applications not tested. |----------------------|---|

|                     |  |
|---------------------|--|
| <b>Specificity:</b> | A small segment of the viral hemagglutinin coat protein is widely used as an epitope tag to facilitate purification and functional analysis of proteins of interest. Epitope tags are short peptide sequences that are easily recognized by readily available tag-specific antibodies. Reacts with proteins displaying the YPYDVDPYA HA-tag. |
|---------------------|--|

|                 |  |
|-----------------|--|
| <b>Storage:</b> | Store the antibody at 4°C. Do not freeze. Shelf life: on |
