DP3511P Polyclonal Antibody to VEGFR-3 / Flt-4 - Aff - Purified

Alternate names: FLT4, Tyrosine-protein kinase receptor FLT4, VEGF Receptor 3, VEGFR3, Vascular

endothelial growth factor receptor 3

Quantity: 50 μg

Background: The sVEGFR-3/FLT-4 monomers have a mass of approximately 120kDa. The soluble

receptor protein consists of all 7 extracellular domains (Met1-Glu774). All three VEGF receptors belong to the class III subfamily of receptor tyrosine kinases (RTKs) characterised by the seven immunoglobulin-like loops in the extracellular domain.

The expression of VEGFR-1 to -3 is almost exclusively restricted to hematopoietic precursor cells, vascular and lymphatic endothelial cells and to the monocyte/macrophage lineage. They play key roles in vasculogenesis,

hematopoiesis, angiogenesis and lymphangiogenesis. The FLT-4 cDNA encodes a 1298 amino acid (aa) residue precursor protein with a 23 aa residue signal peptide. Mature VEGFR-3/FLT-4 is composed of a 751 aa residue extracellular domain, a 22 aa transmembrane domain and a 482aa residue cytoplasmic domain. Both VEGF family members VEGF-C and VEGF-D have been shown to bind and activate VEGFR-3/FLT-4. The Flt-4 gene is widely expressed in the early embryo but becomes restricted to the

lymphatic endothelial

Uniprot ID: P35916

NCBI: NP 002011.2

GeneID: <u>2324</u>

Host / Isotype: Rabbit / IgG

Immunogen: Recombinant human soluble FLT-4 protein (110 kDa).

Format: State: Lyophilized purified Ig fraction

Purification: Protein A Affinity Chromatography

Buffer System: PBS, pH 7.4 containing no preservatives or stabilizers **Reconstitution:** Restore in sterile water to a concentration of 0.1-1 mg/ml.

Applications: ELISA: 0.5-1.5 µg/ml, allows the detection of 0.25-0.5 ng/well rhVEGFR-3/FLT-4.

Western Blot: 0.5-1 μg/ml, it will detect approximately 5 ng/lane of rh VEGFR-3/FLT-4

under reducing conditions depending on the visualisation method.

Immunoprecipitation: 1-5 μg/ml lysate or reaction volume.

FACS: Use 1-5 μg/ml Immunofluorescence.

Immunohistochemistry on Frozen sections.

Other applications not tested. Optimal dilutions are dependent on conditions and

should be determined by the user.

DP3511P: Polyclonal Antibody to VEGFR-3 / Flt-4 - Aff - Purified

Specificity: The antibody will detect human VEGFR-3/FLT-4.

In Western blots, this antibody shows a moderate cross-reactivity with VEGFR-2/KDR

and a weak cross-reactivity with VEGFR-1/Flt-1.

Species: Human.

Other species not tested.

Storage: Store lyophilized at 2-8°C for 6 months or at -20°C long term.

After reconstitution store the antibody undiluted at 2-8°C for one month

or (in aliquots) at -20°C long term. Avoid repeated freezing and thawing. Shelf life: one year from despatch.

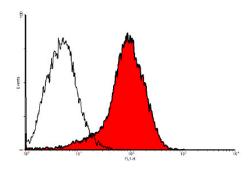

General Readings: 1. Joukov et al., EMBO J 15:290, 1996.

2. Kukk et al., Development 122:3829, 1996.

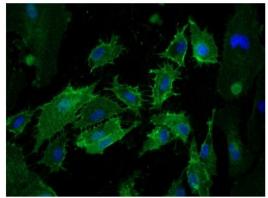

Pictures: FACS analysis with primary human

dermal lymphatic endothelial cells

(HDLEC).

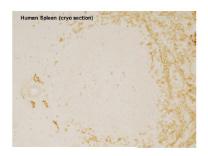

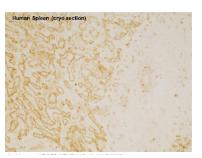

Immunofluorescence staining (green) of VEGFR-3/FLT4 in primary human dermal lymphatic endothelial cells (HDLEC) with anti-human VEGFR-3/FLT4 (10µg/ml) [Cat#DP3511] and counter staining of nuclei with Dapi. As secondary antibody goat anti-rabbit ALEXA Flour 488 (Dianova) was used 1:800.

IHC with cryo sections of human spleen.

Western Analysis of anti-human VEGFR-3/FLT-4 Cat.N-DP3511. Samples were loaded in 7.5% SDS-polyacrylamide gel under reducing conditions.
