

Product information

Product number: IMS01-140-328

Lot Number: 080

Clonality: Polyclonal

Raised in: Hen

Purity: The IgY fraction is isolated by a two-step PEG precipitation procedure followed by ammonium sulphate precipitation. IgY fraction contains 0.9% NaCl, 0.1% NaN₃.

Quantity: 200 µl

Antibody form: Liquid

Storage instructions: 4°C-8°C

Sodium azide is added to prevent bacterial growth when storing the product in 4°C.

Please, remember to spin tubes briefly prior to opening them to avoid any losses that might occur from liquid or lyophilized material adhering to the cap or sides of the tubes.

Background

Candida albicans is the most frequently isolated fungal pathogen of humans, affecting immunocompromised patients ranging from premature infants to AIDS sufferers. Systemic infections have an attributed mortality of 30-50%. C. albicans is a diploid organism which has eight sets of homologous chromosomes. It has a genome of approximately 16 Mb (haploid), about 30% greater than S. cerevisiae (baker's yeast).

Immunogen: Whole formaldehyde killed fungi

Application information

ELISA: 1: 1000
