Recombinant Bovine Prolactin Soluble Receptor

Alternate names: IGF, IGF-1, IGF-IA, IGF-IB, IGF1, IGFIA, IGFIB, Insulin-like Growth Factor 1, MGF,

Somatomedin, Somatomedin C

Catalog No.: PA1057XC

Quantity: 1 mg
Concentration: 1 mg/ml
Species: Bream

Source:

State: Sterile Filtered White lyophilized (freeze-dried) powder.

Purity: >95% Greater than 97.0% as determined by:

(a) Analysis by RP-HPLC.(b) Analysis by SDS-PAGE.

Buffer System: The protein was lyophilized from a concentrated solution with 0.0045mM

NaHCO3.

E. coli

Reconstitution: It is recommended to reconstitute the lyophilized PRL-R in sterile 18M-cm H2O not less than $100\mu g/ml$, which can then be further diluted to other aqueous solutions.

Description: Recombinant Bovine Prolactin Sluble Receptor produced in E.Coli is a non-glycosylated,

Polypeptide chain containing 213 amino acids. The Prolactin Bovine Soluble receptor is

purified by proprietary chromatographic techniques.

AA Sequence:

The sequence of the first five N-terminal amino acids was determined and was

found to be Gln-Ser-Pro-Pro-Glu. **Molecular weight:** 7 kDa 24.4 KDa.

Add. Information: Protein quantitation was carried out by two independent methods:

1. UV spectroscopy at 280 nm using the absorbency value of 2.7 as the extinction

coefficient for a 0.1% (1mg/ml) solution. This value is calculated by the PC GENE computer

analysis program of protein sequences (IntelliGenetics).

2. Analysis by RP-HPLC, using a standard solution of PRL-R as a Reference Standard.

Storage: Lyophilized PRL-R although stable at room temperature for 3 weeks, should be stored

desiccated below -18 C. Upon reconstitution PRL-R should be stored at 4 C between 2-7 days and for future use below -18 C. For long term storage it is recommended to add a

carrier protein (0.1% HSA or BSA). Please avoid freeze-thaw cycles.
