# Recombinant Human Monocyte Chemotactic Protein-1/MCAF (CCL2)

Alternate names: CCL2, MCP1
Catalog No.: PA1156
Quantity: 5 μg
Concentration: 1 mg/ml

Source: E. coli, E.coli

Human

**Species:** 

Format: State: Sterile Filtered White lyophilized (freeze-dried) powder.

Purity: >99% Greater than 98.0% as determined by:

(a) Analysis by RP-HPLC.(b) Anion-exchange FPLC.

(c) Analysis by reducing and non-reducing SDS-PAGE Silver Stained gel.

Buffer System: Lyophilized from a concentrated solution in water containing no additives.

**Endotoxin Level:** Less than 0.1 ng/μg (IEU/μg) of rHuMCP-1.

**Dimers:** Less than 1% as determined by silver-stained SDS-PAGE gel analysis.

 $\textbf{Reconstitution:} \ It is \ recommended \ to \ reconstitute \ the \ lyophilized \ rHuMCP-1 \ in \ sterile \ 18M\Omega-1000 \ reconstitute \ the \ lyophilized \ rHuMCP-1 \ in \ sterile \ 18M\Omega-1000 \ reconstitute \ recon$ 

cm H2O not less than 100µg/ml, which can then be further diluted to other aqueous

solutions.

**Description:** Recombinant Human MCP-1 also known as Monocyte Chemotactic and Activating Factor

(MCAF) produced in E.Coli is a non-glycosylated, Polypeptide chain containing 76 amino

acids. The rHuMCP-1 is purified by proprietary chromatographic techniques.

AA Sequence:

The sequence of the first five N-terminal amino acids was determined and was

found to be Gln-Pro-Asp-Ala-Ile.

**Biological Activity:** MCP-1 is fully biologically active when compared to standard.

ED50=3.0-10 ng/mL. The biological activity was determined by measuring dose dependent

chemotaxis with human THP-1 cells. Molecular weight: 8607 Dalton.

Molecular weight: 9 kDa

Add. Information: Protein quantitation was carried out by two independent methods:

1. UV spectroscopy at 280 nm.

2. Analysis by RP-HPLC, using a standard solution of MCP-1 as a Reference Standard.

Storage: Lyophilized rHuMCP-1 although stable at room temperature for 3 weeks, should be stored

desiccated below -18 C. Upon reconstitution rHuMCP-1 should be stored at 4 C between 2-7 days and for future use below -18 C. For long term storage it is recommended to add a

carrier protein (0.1% HSA or BSA). Please avoid freeze-thaw cycles.

For research and in vitro use only. Not for diagnostic or therapeutic work. Material Safety Datasheets are available at www.acris-antibodies.com or on request.
