

## Acinus Antibody

<b>Catalog No.:</b>	PM58
<b>Quantity:</b>	0.2 mg
<b>Concentration:</b>	1 mg/ml
<b>Background:</b>	Apoptotic events such as chromatin condensation and nuclear fragmentation are triggered by the activation of a family of cysteine proteases called caspases. A novel protein, Acinus, induces apoptotic chromatin condensation after cleavage by caspase-3 without inducing DNA fragmentation and is essential for apoptotic chromatin condensation.
<b>Host / Isotype:</b>	Rabbit
<b>Immunogen:</b>	Immunogen sequence is commercially sensitive and details are not available.
<b>Format:</b>	<b>State:</b> Liquid <b>Purification:</b> Purified IgG <b>Buffer System:</b> Phosphate-buffered saline containing 0.02% sodium azide.
<b>Applications:</b>	WB Other applications not tested. Optimal dilutions are dependent on conditions and should be determined by the user.
<b>Specificity:</b>	Human - Not yet tested in other species
<b>Storage:</b>	Keep as concentrated solution. Store at 4

**For research and in vitro use only. Not for diagnostic or therapeutic work.**
