

R1118**Polyclonal Antibody to Uricase - Serum**

Alternate names:	EC 1.7.3.3, UOX, URIC, URO, Urate oxidase
Quantity:	2 ml
Concentration:	90.0 mg/ml (by Refractometry)
Uniprot ID:	Q5WBJ3
NCBI:	YP_177228.1
GeneID:	3202700
Host:	Goat
Immunogen:	Uricase [Bacillus species].
Format:	State: Lyophilized purified Ig fraction. Purification: Prepared from monospecific antiserum by a delipidation and defibrination. Buffer System: 0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2 with 0.01% sodium azide as preservative. Reconstitution: Restore with 2.0 ml of deionized water (or equivalent).
Applications:	Suitable for Immunoblotting (Western or Dot blot), ELISA, Immunoprecipitation and most immunological methods requiring high titer and specificity. Recommended Dilutions: This product has been assayed against 1.0 ug of Uricase [Bacillus species] in a standard sandwich ELISA using Peroxidase conjugated Affinity Purified anti-Goat IgG [H&L] (Rabbit) and (ABTS (2,2'-azino-bis-[3-ethylbenthiiazoline-6-sulfonic acid]) as a substrate for 30 minutes at room temperature. A working dilution of 1:4,000 to 1:36,000 of the reconstitution concentration is suggested for this product. Other applications not tested. Optimal dilutions are dependent on conditions and should be determined by the user.
Specificity:	Assay by immunoelectrophoresis resulted in a single precipitin arc against purified and partially purified Uricase [Bacillus species]. Cross reactivity against Uricase from other sources is unknown.
Storage:	Store vial at 2-8°C prior to restoration. For extended storage aliquot contents and freeze at -20°C or below. Centrifuge product if not completely clear after standing at room temperature. This antibody is stable for one month at 2-8°C as an undiluted liquid. Dilute only prior to immediate use. Avoid repeated freezing and thawing. Shelf life: One year from despatch.
