

SM2051P**Monoclonal Antibody to MHC Class II DR (monomorphic) - Purified**

Quantity:	0.25 mg
Concentration:	1.0 mg/ml
Background:	The distribution of ovine DR molecules on T lymphocytes has been shown to vary with immune status and age. Initially T lymphocytes lack class II molecules, then T lymphocytes progressively express DR molecules.
Host / Isotype:	Mouse / IgG2a
Recommended Isotype Controls:	AM03096PU-N
Clone:	37.68
Immunogen:	Splenocytes from ATL mice.
Format:	State: Liquid purified IgG Purification: Affinity chromatography on Protein G Buffer System: PBS, pH 7.4 containing 0.09% Sodium Azide
Applications:	Immunoprecipitation. Immunohistochemistry on frozen sections. Flow Cytometry: 1/50 - 1/200; Use 10µl of the suggested working dilution to label 1 x 10e6 cells in 100µl. Other applications not tested. Optimal dilutions are dependent on conditions and should be determined by the user.
Specificity:	This antibody recognises a monomorphic epitope on MHC class II DR molecules. Species: Sheep, Bovine, Goat, Human. Other species not tested.
Storage:	Store the antibody undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer. Avoid repeated freezing and thawing. Shelf life: one year from despatch.
